

PLAN - RIVER VALLEY ROAD

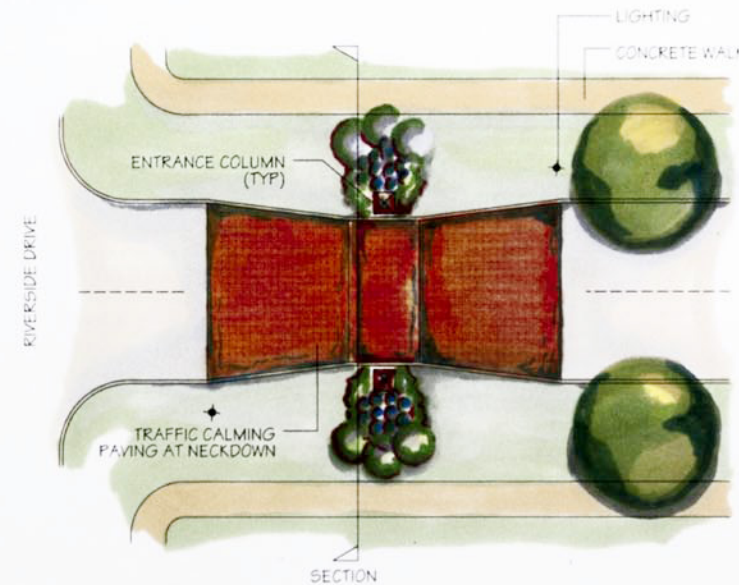

SECTION - TYPICAL ENTRANCE TREATMENT

SCALE: 1/4" = 1' - 0"

NECKDOWN / ENTRY FEATURE

THE NECKDOWN / ENTRY FEATURE ACTS AS A GATEWAY INTO THE COMMUNITY. IT CREATES NEIGHBORHOOD IDENTITY AND SYMBOLIZES ENTRY INTO AN AREA OR DISTRICT THAT DOES NOT BELONG TO THE DRIVER. THE NECKDOWN, WITH ITS VERTICAL COLUMNS, GIVES A SENSE OF CLOSENESS WHILE BLOCKING MUCH OF THE IMMEDIATE VIEW. THIS IS AN EFFECTIVE TOOL TO LET THE DRIVER KNOW THAT THIS IS A COMMUNITY - NOT AN EXPRESSWAY. THE DESIGN OF THE ENTRY PROVIDES AN ELEMENT OF DEFLECTION, WHICH REQUIRES THE DRIVER TO MANEUVER OFF OF A STRAIGHT COURSE AND REDUCE THEIR SPEED.

PLAN - RIVER VALLEY RD/RIVERSIDE DR ENTRANCE TREATMENT

SCALE: 1" = 10' - 0"
